SAA6D107E-3 EPA Tier 4 Final emissions certified engine has a water cooled variable geometry turbocharged and aftercooled 6.8 liter diesel engine which provides fuel & DEF TOTAL consumption less than the fuel consumed by the prior model.

New Komatsu Diesel Particulate Filter (KDPF) and Selective Catalytic Reduction (SCR) systems reduce particulate matter and NOx while providing automatic regeneration that does not interfere with daily operation.

Komatsu Auto Idle Shutdown helps reduce nonproductive engine idle time and reduces operating costs.

Rear view monitoring system (standard) is integrated into the monitor panel and can be auto synced to reverse travel for improved operator awareness.

Advanced diagnostic system continuously monitors machine operation and vital systems to identify machine issues, assists with troubleshooting, and minimizes down time.

New higher performance water-cooled Variable Geometry Turbocharger (VGT) uses a hydraulic actuator to provide optimum air flow under all speed and load conditions.

Efficient Cooling System:
- Electronically controlled, hydraulically-driven fan can be easily reversed through the monitor
- Rear hinged radiator guard with gas assisted lift cylinders opens easily for cleaning
- Side-by-side single plane coolers help reduce chances of plugging and simplify maintenance

The KOMTRAX® telematics system is standard on Komatsu equipment with no subscription-fee's throughout the life of the machine. Using the latest wireless technology, KOMTRAX® transmits valuable information such as location, utilization, and maintenance records to a PC or smartphone app. Custom machine reports are provided for identifying machine efficiency and operating trends. KOMTRAX® also provides advanced machine troubleshooting capabilities by continuously monitoring machine health.

Operator Identification System (standard) provides KOMTRAX data for machine operation and applications for up to 100 individual ID codes.

Integrated ROPS cab features:
- Large, quiet, pressurized cab meets ISO 3471 standard
- Exceptional visibility with super slant nose design and integrated ROPS structure
- Heated air-suspension seat (standard)
- Standard aux jack and (2) 12V power convertors

Improved durability:
- Heavy-plate steel used for the nose and the hydraulic and fuel tanks
- Dozer frame with steel castings
- Komatsu designed and manufactured components
- High wear-resistant dozer mold board

Rear Hydraulics (Standard)

Self-adjusting idler support provides constant and even idler tension, reducing vibration and increasing undercarriage life.

Standard Parallel Link Undercarriage System (PLUS) provides up to double the wear life and lowers repair and maintenance costs compared to a standard undercarriage design.

New Triple Labyrinth Final Drive Shield design provides additional protection for the final drive floating seals.

Power Angle Tilt (PAT) dozer with manually adjustable blade pitch increases productivity in a variety of applications.

New high-engine-RPM (H) mode helps maintain ground speed during heavy blade load applications.

Complete operator blade control:
- Palm Command Control System (PCCS)
- Electronic Proportional Control (EPC)
- Blade angle switch
- Three blade control settings (fine, normal, fast)
- Up to 5 individual operator settings can be stored

Efficient Hydrostatic Transmission with electronic control:
- Customizable quick shift (3 speed) settings for the operator
- Variable speed selection (20 speeds)
- HST control system helps reduce fuel consumption and improves maneuverability

Large color monitor:
- Easy-to-read and use large 7” high-resolution multi-color LCD monitor
- Ecology guidance
- Easy-to-use onboard diagnostics that don’t require a laptop
- Real-time DEF monitoring so the operator can see actual DEF levels
- Five customizable operator settings for machine control
- Integrated rearview camera

Convenient shovel holder (standard)
**PERFORMANCE FEATURES**

**KOMATSU NEW ENGINE TECHNOLOGIES**

**Komatsu's New Emission Regulations-Compliant Engine**

In addition to refining the Tier 4 Interim technologies, Komatsu developed a new Selective Catalytic Reduction (SCR) device in-house.

**Technologies Applied to the New Engine**

**Heavy-Duty Aftertreatment System**

This new system combines a Komatsu Diesel Particulate Filter (KDPF) and Selective Catalytic Reduction (SCR). The SCR NOx reduction system injects the correct amount of DEF at the proper rate, transforming NOx into non-toxic water (H₂O) and nitrogen gas (N₂).

**Heavy-Duty Cooled Exhaust Gas Recirculation (EGR) System**

The system recirculates a portion of exhaust gas into the air intake and lowers combustion temperatures, thereby reducing NOx emissions. EGR gas flow has been decreased for Tier 4 Final with the addition of SCR technology. The system achieves a dynamic reduction of NOx, while helping reduce fuel consumption below Tier 4 Interim levels.

**Advanced Electronic Control System**

The electronic control system performs high-speed processing of all signals from sensors installed in the vehicle, providing total control of equipment in all conditions. Engine condition information is displayed via an on-board network to the monitor inside the cab, providing necessary information to the operator. Additionally, managing the information via KOMTRAX helps customers keep up with required maintenance.

**Variable Geometry Turbocharger (VGT) system**

The VGT system features proven Komatsu design hydraulic technology for variable control of air-flow and supplies optimal air according to load conditions. It provides better exhaust temperature management. The Tier 4 final version has an improved propeller design for increased performance.
Heavy-Duty High-Pressure Common Rail (HPCR) Fuel Injection System
The system is designed to achieve an optimal injection of high-pressure fuel by means of computerized control, providing close-to-complete combustion to reduce PM emissions. The system uses high pressure injection, thereby reducing both PM emissions and fuel consumption over the entire range of engine operating conditions. The Tier 4 Final engine has advanced fuel injection timing for reduced fuel consumption and lower soot levels.

Komatsu Closed Crankcase Ventilation (KCCV)
The KCCV efficiency is significantly increased from previous models from around 50% to 95% efficiency.

Redesigned combustion chamber at top of piston
The combustion chamber at the top of the piston has a new shape designed to improve combustion and further reduce NOx, PM, fuel consumption and noise.

Komatsu Auto Idle Shutdown
Komatsu auto idle shutdown automatically shuts the engine down after idling for a set period of time to reduce unnecessary fuel consumption and exhaust emissions. The amount of time before the engine is shutdown can be easily programmed from 5 to 60 minutes.
HYDROSTATIC TRANSMISSION (HST) CONTROL SYSTEM

Hydraulic Transmission (HST) control system
The HST controller monitors engine output and work load. It controls HST pump and motor displacement to provide the optimum speed and drawbar pull. Full power to both tracks during turns or counter-rotation makes the D61EX/PX-24 extremely maneuverable.

Fuel Efficiency
The efficient electronically controlled HST system can reduce fuel consumption.

Hydraulically Driven Cooling Fan
The engine cooling fan’s speed is electronically controlled. The fan speed depends on engine coolant, oil temperatures and the fan will only rotate as fast as is necessary to adequately cool the machine’s fluid. This system increases fuel efficiency, reduces operating noise levels and uses less horsepower than a belt-driven fan.

Long Track-On-Ground and Oscillating Track Frame
Long machine track-on-ground and oscillating track frames improve stability and grading/dozing performance.

Selectable Working Mode
P mode is the mode designed for powerful operation and maximum production. E mode is designed for general dozing applications providing adequate speed and power while saving energy. For fuel reduction and energy saving, the monitor panel allows the operator to easily switch the working mode, depending on the work at hand.

P mode (Power mode)
With P mode, the engine outputs its full power, allowing the machine to perform the work requiring large production, heavy-loads and uphill work.

E mode (Economy mode)
With E mode, the engine outputs enough power for the work without delivering unnecessary power. This mode enables energy saving operation and is ideal on hard or rough surfaces that often cause shoe slip and work not requiring as much power, such as downhill dozing, leveling and light-load work.

H mode (High engine idle speed mode)
This setting allows subtle changes in load to be detected, which is tailor-made for power-intensive work. Compared to P mode, the engine high-idle speed is higher in H mode.
PAT Dozer with Adjustable Pitch

A power angle power tilt dozer blade with adjustable blade pitch system is available. This blade is available for the D61EX/PX-24 machines. The hydraulic blade tilt, angling function (and manually adjustable blade pitch) expand versatility and productivity in a variety of applications.

New High Wear Resistant Blade

The wear life of the blade skin has been improved with the addition of wear resistant high strength steel.

Unrivaled Blade Visibility

The D61EX/PX-24 incorporates Komatsu’s super-slant nose design. Komatsu’s innovative design provides excellent blade visibility for improved machine control and increased efficiency and productivity.

Tie Off Points Standard (ISO 14567)

When working in elevated positions, four tie off points (one at each corner of the cab) provide anchors for technician harness lanyards.
CONTROL FEATURES

Palm Command Control System (PCCS) Levers
Komatsu’s ergonomically-designed PCCS handles create an operating environment with complete operator control.

PCCS
The low-effort PCCS joystick controls all directional movements, including machine travel speed as well as counter-rotation.

Electronic Controlled Hydraulic System
The electronic controlled, palm commanded joystick provides precise blade control. New blade angling switch operation provides easier and predictable blade control.

HST with Electronic Control
The D61EX/PX-24 is equipped with Komatsu-designed HST that allows for Quick-Shift or Variable speed selection. The HST features dual-path closed-circuits with two variable displacement piston pumps and two variable displacement travel motors. Hydrostatic steering eliminates steering clutches and brakes, providing smooth powerful turns. Fully electronic control provides full automatic shifting and enables smooth control. An electronic fuel control dial controls engine speed.

One-Pedal Design (Decelerator/Brake Pedal)
Controls Speed, During Operation
Machine operation is simple because brake function has been integrated into the decelerator pedal. Machine travel speed can be controlled using one pedal. The pedal function can be changed by a mode selector switch.

Decelerator mode: The pedal modulates engine rpms and vehicle travel speed. It can be used for all applications.

Brake mode: The pedal modulates vehicle travel speed while maintaining high-engine speed. This mode can be helpful to maintain work-equipment speed, while using the brake function.
WORKING ENVIRONMENT

Integrated ROPS (ISO 3471) Cab
The D61EX/PX-24 has an integrated ROPS (ISO 3471) cab. High rigidity and superb sealing performance sharply reduce noise and vibration for the operator and discourage dust from entering the cab. In addition, side visibility is increased because external ROPS (ISO 3471) structure and posts are not required.

Comfortable Ride with Cab Damper Mounting
The D61EX/PX-24’s cab mount uses a cab damper system that provides the kind of excellent shock and vibration absorption which conventional mounting systems are unable to match. The silicon-oil-filled cab damper mount helps to isolate the cab from the machine body, suppressing vibration and providing a quiet, comfortable operating environment.

Auxiliary Input Jack & Two Electrical Outlets
By connecting an auxiliary device to this plug input, the operator can play audio from a mobile device through the machine’s sound system. Two DC 12 volt electrical outlets provide a power source for a radio or other equipment.

Comfortable Ride with Heated Operator Seat
The operator seat has adjustable lumbar support, tilt and an electric heater. It is easy to adjust to the operator’s shape. Also, the standard seat heat makes it possible to work comfortably in the winter.

Additional Operator Convenience Equipment
- Rear view monitor system
  On the large LCD color monitor, the operator can view, through one camera, areas directly behind the machine. This camera can be synchronized with reverse operation.
- Secondary engine shutdown switch
  A secondary switch has been added at the side of the front console to shut down the engine in an emergency.
Excellent Reliability & Durability
Parallel Link Undercarriage System (PLUS)
Komatsu’s new PLUS provides less downtime, plus longer wear with up to 40% lower undercarriage maintenance costs. Rotating bushings eliminate the cost and downtime for bushing turns, and strengthened rollers and links increase wear life up to two times. With PLUS, individual links can be replaced with common track tools.

Modular design
One of the design goals behind the creation of the D61EX/PX-24 was to manufacture a more durable machine. This was achieved by reducing component complexity and using a strong modular design for increased serviceability and durability. Steel castings reduce the number of welds, improving rigidity and strength.

Self-adjusting idler support
The self-adjusting idler support provides constant and even tension on idler guide plates reducing noise and vibration and increasing undercarriage life.

Easy Maintenance
Planned maintenance and daily checks are the only way to ensure long service life from equipment. That’s why Komatsu designed the D61EX/PX-24 with conveniently located maintenance points to make necessary inspections and maintenance quick and easy.

Hydraulically-driven swing-up fan
The D61EX/PX-24 utilizes a swing-up fan with a gas strut-assisted lift system to provide easy access to the (side-by-side) radiator, oil cooler and charge air cooler. The hydraulic fan has a cleaning mode which can be used for periodic cooler cleaning.
**TECHNOLOGY FEATURES**

**Large Multi-Lingual High Resolution LCD Monitor**
A large, user-friendly color monitor provides easy-to-understand information for the operator. Excellent screen visibility is achieved with a high resolution LCD monitor that is easy to read at various angles and lighting conditions. Simple and easy to operate switches and function keys facilitate multi-function operations. The monitor displays data in 26 languages.

![Image of LCD Monitor](image1)

**Energy Saving Operation**

**Ecology guidance**
In order to support efficient operation, the following 4 messages are displayed for fuel saving operation. These can be disabled by the operator if desired.

1) Avoid Excessive Engine Idling
2) Use Economy Mode to Save Fuel
3) Avoid Hydraulic Relief Pressure
4) Avoid Over Load

**Ecology gauge**
To help the operator perform in an environmentally-friendly way and to minimize energy consumption, an easy-to-read “ecology gauge” is displayed on the left of the multi-monitor screen.

**Fuel consumption display**
Average fuel consumption during the day is displayed and updated every 10 seconds.

**Ecological Operation Report for Assistance**
KOMTRAX® is Komatsu’s remote equipment and fleet monitoring system. Wireless technology and a secure Web-based application offers the information needed to make the best possible operation and management decisions, from location, actual hours worked, and fuel consumption to maintenance monitoring, abnormality codes, and load frequency, in simple to read and understand reports. The new D61EX/PX-24 adds the following new information for fuel consumption reduction.

- Guidance to improve fuel consumption
- Ecological operation report
- Report operation hours by operation mode (E, P, or H mode)

![Image of KOMTRAX®](image2)
KOMATSU PARTS & SERVICE SUPPORT

KOMATSU CARE®
Program Includes:
*The D61EX/PX-24 comes standard with complimentary factory scheduled maintenance for the first 3 years or 2,000 hours, whichever occurs first.

Planned Maintenance Intervals at:
500/1000/1500/2000 hour intervals. (250 hr. initial interval for some products) Complimentary Maintenance Interval includes: Replacement of Oils & Fluid Filters with genuine Komatsu Parts, 50-Point Inspection, Komatsu Oil & Wear Analysis Sampling (KOWA) / Travel & Mileage (distance set by distributor; additional charges may apply).

Benefits of Using Komatsu CARE
* Assurance of Proper Maintenance with OEM Parts & Service
* Increased Uptime & Efficiency
* Factory Certified Technicians Performing Work
* Cost of Ownership Savings
* Transferable Upon Resale

Complimentary KDPF Exchanges
The D61PX/EX-24 comes standard with 2 Complimentary KDPF Exchange Units for the first 5 years or 9,000 hours whichever occurs first. The suggested KDPF Exchange unit service intervals are 4,500 hours & 9,000 hours. End user must have authorized Komatsu distributor perform the removal & installation of the KDPF.

Complimentary SCR Maintenance
The D61EX/PX-24 also includes 2 factory suggested services of the Selective Catalytic Reduction (SCR) Diesel Exhaust Fluid (DEF) system during the first 5 years or 9,000 hours whichever occurs first. The service includes factory suggested DEF tank flush & strainer cleaning at the suggested service intervals of 4,500 hours & 9,000 hours.

KOMATSU CARE® – Advantage Extended Coverage
• Extended Coverage can provide peace of mind by protecting customers from unplanned expenses that effect cash flow
• Purchasing extended coverage locks-in the cost of covered parts and labor for the coverage period and helps turn these into fixed costs

Komatsu Parts Support
• 24/7/365 to fulfill your parts needs
• 9 parts Distribution Centers strategically located across the U.S. and Canada
• Distributor network of more than 300 locations across U.S. and Canada to serve you
• Online part ordering through Komatsu eParts
• Remanufactured components with same-as-new warranties at a significant cost reduction

Komatsu Oil and Wear Analysis (KOWA)
• KOWA detects fuel dilution, coolant leaks, and measures wear metals
• Proactively maintain your equipment
• Maximize availability and performance
• Can identify potential problems before they lead to major repairs
• Reduce life cycle cost by extending component life

* Certain exclusions and limitations apply. Refer to the customer certificate for complete program details and eligibility. Komatsu® and Komatsu Care® are registered trademarks of Komatsu Ltd. Copyright 2019 Komatsu America Corp.
KOMTRAX EQUIPMENT MONITORING

**WHAT**
- KOMTRAX is Komatsu's remote equipment monitoring and management system
- KOMTRAX continuously monitors and records machine health and operational data
- Information such as fuel consumption, utilization, and a detailed history lowering owning and operating cost

**WHEN**
- Know when your machines are running or idling and make decisions that will improve your fleet utilization
- Detailed movement records ensure you know when and where your equipment is moved
- Up to date records allow you to know when maintenance is due and help you plan for future maintenance needs

**WHERE**
- KOMTRAX data can be accessed virtually anywhere through your computer, the web or your smart phone
- Automatic alerts keep fleet managers up to date on the latest machine notifications

**WHO**
- KOMTRAX is standard equipment on all Komatsu construction products

**WHY**
- Knowledge is power - make informed decisions to manage your fleet better
- Knowing your idle time and fuel consumption will help maximize your machine efficiency
- Take control of your equipment - any time, anywhere

---

KOMTRAX®
For construction and compact equipment.

KOMTRAX Plus®
For production and mining class machines.

### STEERING SYSTEM

PCCS joystick control for all directional movements. Pushing the joystick forward results in forward machine travel, while pulling it backward reverses the machine. Simply tilt the joystick to the left or right to make a turn. Tilting the joystick fully to the left or right activates counter-rotation. HST eliminates steering clutches and brakes, providing smooth powerful turns. Fully electronic control enables smooth control. The PCS utilizes shift buttons to increase and decrease speed.

- Minimum turning radius: D61EX-24: 2.1 m 83"; D61PX-24: 2.3 m 91"

### UNDERCARRIAGE

Suspension: Oscillating-type with equalizer bar and pivot shafts. Track roller frame: Monocoque, large section, durable construction.

- Rollers and idlers: Lubricated track rollers
- Lubricated tracks: Parallel Link Undercarriage System (PLUS) with lubricated rotating bushings for extended system life and lower maintenance costs.
- Track tension: Easily adjusted with grease gun.

**HYDRAULIC SYSTEM**

Closed-Center Load Sensing System (CLSS) designed for precise and responsive control, and for efficient simultaneous operation.

Hydraulic control unit:
All spool control valves externally mounted remote to the hydraulic tank. Piston-type hydraulic pump with capacity (discharge flow) of 171 ltr/min 45 U.S. gal/min at rated engine rpm.

Relief valve setting: 27.4 MPa 280 kg/cm² 3,974 psi

Hydraulic oil capacity (refill):
Power angle tilt dozer: 101 ltr 26.7 U.S. gal

Control valves:
3-spool control valve for Power Angle Tilt dozer
- Positions:
  - Blade lift: Raise, hold, lower, and float
  - Blade tilt: Right, hold, and left
  - Blade angle: Right, hold, and left

Additional control valve required for ripper
- Positions:
  - Ripper lift: Raise, hold, and lower

Blade capacities are based on the recommended practice ISO 9246. Use of high-tensile-strength steel in moldboard for strengthened blade construction.
STANDARD EQUIPMENT FOR BASE MACHINE*

- Accumulator for Electric Proportional Control (EPC)
- Air cleaner, dry, double element type with caution lamp on monitor
- Air conditioner (A/C)
- Air inlet
- Alternator, 24 V/90 A
- Back-up alarm
- Batteries, large capacity 24 V/200 Ah
- Cab accessories
  - 12 V x 2 power supply
  - Cup holder
  - Rear view mirror
  - Rear view monitor system (1 camera)
- Crankcase guard and underguard
- Decelerator/brake pedal (Single pedal)
- Electronically controlled Hydrostatic Transmission (HST) with quick-shift and variable speed settings
- Electronic monitor panel with on-board diagnostics
- Engine hood and side panels
- Engine, KOMATSU SAA6D107E-3, gross output of 127 kW (170 HP)
- Engine secondary shutdown switch
- Fan, hydraulic driven, electronic control
- Filler cap locks and cover locks
- Foot rest, high mounted
- Fuel pre-filter (10 micron) and fuel filter (2 micron)
- Grease gun holder
- High altitude arrangement (No fuel adjustment up to 2300 m)
- Horn
- Hydraulics for PAT dozer
- Hydraulics for rear equipment
- Intake pipe with precleaner
- Komatsu Diesel Particulate Filter (KDPF)
- KOMTRAX Level 5.0
- Large high-resolution LCD color monitor
- Lunch box holder
- Marks and plates, English
- New Operator Identification System
- Palm Command Control System (PCCS) with electronic control for travel control
- Palm Command Control System (PCCS) with EPC for blade control
- Power turn with counter rotation
- Pullhook, front
- Radiator guard grid
- Radiator reserve tank
- Real-time DEF monitoring
- Rear-hinged radiator guard
- Reverse travel speed presets
- ROPS cab
- Seat belt, 76 mm 3” retractable
- Seat belt indicator
- Seat, air suspension, fabric, heated, low back, headrest
- Shoveler holder
- Starting motor, 24 V/5.5 kW
- Selective Catalytic Reduction (SCR)
- Self adjusting roller
- Side by side rear mounted cooling package
- Sprockets, bolt-on
- Sprocket inner guard
- Sprocket, bolt-on
- Triple labyrinth final drive shield design
- Underguards, heavy duty
  - Engine
  - Transmission
- Variable Geometry Turbocharger (VGT)
- Water separator
- Worklamp (Front 3, rear 2)
