Photos may include optional equipment.

**GROSS HORSEPOWER**
2,500 HP 1865 kW

**NOMINAL GVW**
901,400 lb 408875 kg
PRODUCTIVITY FEATURES
- High performance Komatsu SDA16V160 engine Gross Horsepower 1,865 kW 2,500 HP
- 3,207 kW 4,300 HP retarding
- Traction (spin-slide) control
- Cruise control
- Komatsu designed application specific body
- Tight turning radius 14 m 45' 9"
- Payload Meter IV®

ENVIRONMENTALLY FRIENDLY
- Komatsu SDA16V160 engine with after-treatment meets U.S. EPA Tier 4 Final emissions regulations
- Fuel efficient engine
- Less fluids compared to mechanical drive trucks

Photos may include optional equipment.

HORSEPOWER
Gross: 2,500 HP 1,865 kW

NOMINAL PAYLOAD
250 US tons 227 metric tons
OPERATOR ENVIRONMENT
- Ergonomically designed spacious cab with excellent visibility
- Fully adjustable driving position settings
- Four post ROPS/FOPS level 2 cab
- User friendly display with payload information
- Komatsu Hydraul® II suspensions designed for optimum ride comfort
- AM/FM/CD/MP3/USB/weather band radio

RELIABILITY FEATURES
- Frame design optimized for 227 metric tons 250 US tons
- Simple and reliable hydraulic system
- Steering and brake accumulators
- Hydraulically actuated dry disc brakes

EASY MAINTENANCE
- KOMTRAX Plus 2® allows immediate diagnostics of key engine, chassis, and drive system components
- Automatic lubrication system
- Eliminator® oil filtration system
- Flange mounted rims with optional Komatsu Smart, speed type rims
- In-tank fast fuel
PRODUCTIVITY FEATURES

Komatsu High Horsepower Engine
Komatsu’s 2500 HP engine will operate in most of today’s mining applications without experiencing power derate. Fuel efficiency is maximized due to optimized air handling. Standard features include:

- A standard pre-lube system designed to reduce start-up wear and increase overhaul life.
- CENSE® on board monitoring of engine performance for each cylinder.
- ELIMINATOR® filtration system reduces oil and filter changes by one-third.

IGBT AC Electric Drive System
The GTA51 traction alternator coupled with GEB36 wheel-motors and Inverter Ile® AC control system provides reliable performance and easy maintenance. Inverter Ile® offers independent control of the rear wheelmotors, which in turn provides outstanding traction-ability during wet and slippery conditions, thus improving tire wear and operator confidence.

The air cooled Insulated Gate Bipolar Transistor (IGBT) inverter system technology provides the highest available reliability. The IGBT inverter is more compact and much simpler than the design of its predecessor, the Gate Turn Off (GTO) inverter, which improves serviceability and routine maintenance.

Electric Dynamic Retarder
The 3207 kW 4,300 HP retarding system provides state of the art braking capacity for navigating today’s mining applications which contain steep continuous descents and sharp switchbacks. Continuous retarding capacity enhances the productivity of the vehicle operator, while eliminating the need for excessive mechanical braking effort.
**Traction (Spin-Slide) Control**
During slippery conditions, the 830E-5 wheel traction control technology detects and corrects wheel spin or slide events. Traction control operates automatically and independently of the service brakes. During propulsion, “wheel slip control” reduces non-productive wheel spin in low traction conditions. During retarding, “wheel slide control” prevents wheel lockup and potential subsequent sliding.

**Cruise Control**
Cruise control, both in propulsion and retarding, allows the operator to concentrate on steering and situational awareness while maintaining a constant speed. A set speed indicator provides confirmation the truck speed matches the desired speed selected by the operator, with simple automotive style controls.

**Komatsu Designed Application Specific Body**
Utilizing the required Body Worksheet (BW) process, Komatsu ensures that each body is designed to meet the requirements for each specific application while carrying its rated payload. Komatsu works with each customer to understand all of the material properties at a mine site and to identify the appropriate liner package.

Komatsu offers a standard all-welded steel, flat floor body with a full canopy and horizontal bolsters. This body includes a driver side eyebrow, body up sling, and rubber mounts on the frame.

- Standard Body SAE Heaped 2:1: 158 m³ **207 yd³**
- Standard Komatsu Body Weight: 29830 kg **65,762 lbs**
Hydrair II® Hydropneumatic Suspension

Hydrair II® is a suspension system that utilizes four nitrogen-over-oil cylinders. This suspension system is designed to maximize machine productivity by providing the operator with a smooth and comfortable ride. By absorbing shocks to the chassis during operation, Hydrair II® contributes to the durability of the machine’s frame and components.

Payload Meter IV (PLM IV®)

PLM IV® is an electronic system that monitors and records payload information for Komatsu’s off-highway mining trucks. The accurate and reliable payload measurement system is designed to help optimize payload, maximize productivity and reduce the life cycle cost of the machine. PLM IV® tracks and records the following key production parameters:

- Payload
- Empty Carry-Back
- Operator Identification
- Haul Cycle, Loading, Dumping Time and Date
- Distance Traveled (Loaded and Empty)
- Cycle Time Information
- Maximum Speeds (Loaded and Empty)
- TMPH Estimate for Front and Rear Tires
- Average Speed (Loaded and Empty)

Tight Turning Radius

By using double acting hydraulic steering cylinders with a six-point articulation linkage, the 830E-5 power steering system provides positive steering control with minimal operator effort. The turning radius of the 830E-5 is 14 m 46', which provides excellent maneuverability for tight loading and dumping conditions. The steering accumulators comply with ISO-5010 standards.
**Ergonomically Designed Cab**

The Komatsu 830E-5 cab design provides a comfortable and productive environment to meet today’s mining demands. The cab includes tinted safety glass windows, heating and air conditioning, acoustical insulation, double sealed doors and filtered and pressurized air to reduce dust.

**Built-in ROPS and FOPS Structure**

These structures conform to ISO standards 3471 and 3449.

**Operator Seat**

Komatsu recognizes that operator comfort is a key to productivity in today’s mining environment. The five-way adjustable operator seat and the tilt-telescopic steering column provides an optimum driving posture for increased operator comfort and control over the machine. The air suspension seat absorbs vibrations transmitted from the machine, reducing operator fatigue. A 51 mm 2 in wide, blaze orange, three-point seat belt is provided as standard equipment.

**User Friendly Display**

The 830E-5 comes with a new operator friendly dash configuration which includes lighted gauges, switches and information panel. This allows the operator to see the status of the machine during operation and informs them of any faults. An instructive message will appear after any fault is detected on the machine.
Evolutionary, not Revolutionary Design
Komatsu’s Tier 4 solution begins with a base engine which is very similar to the previous Tier 2 platform. In keeping the basic operation of the engine the same, durability is assured. Utilizing High Pressure Common Rail fuel delivery ensures atomization of the fuel/air mixture to a level which reduces particulate matter, meeting U.S. EPA Tier 4 standards.

Komatsu After-treatment
Removal of NOx is accomplished by treating the exhaust through Selective Catalytic Reduction (SCR). The introduction of Diesel Exhaust Fluid (DEF) into the SCR canister generates a chemical reaction which breaks down the oxides of nitrogen into oxygen and nitrogen, both non-pollutants. Internal cleaning of the SCR is performed through an automatic process.
**On-Demand Cooling**

- Separate cooling circuits for control group and wheel motor systems
- Allows intelligent control of cooling
- Maintain optimal temperatures for each system

**Alternator Self-Cooling Only**

- Reduced impeller size by 25%
- Reduced cooling housing/impeller
- **500 lb 227 kg** weight reduction

**Uses Wheel Motor generator retarding energy for cooling**

- Control Group
- Wheel Motors
- Grid Blower
RELIABILITY FEATURES

**Structurally Enhanced Frame Design**
By using advanced computer-aided design, finite element analysis, and full-scale dynamic testing, the frame has been designed to carry 227 metric tons 250 short tons and provides the high structural reliability Komatsu is known for.

**Castings Used in High Stress Areas**
To increase frame reliability, steel castings have been incorporated at key frame pivot points and critical load bearing portions of the structure. This includes the rear body pivot and horsecollar sections.

**Simple and Reliable Hydraulic System**
The hydraulic system is a proven and reliable design with fewer parts than other OEMs. The system utilizes a single tank, providing one common source of fluid for steering, braking, and hoisting. In-line, replaceable filtration elements provide protection from hydraulic system contamination, making the system easier to service.

To keep downtime to a minimum, Komatsu developed a sub-frame pump module that can be removed and replaced as a single unit. This reduces change-out time and allows easy access to the hydraulic pump module.

**Proven Wheel Motor Design**
The GEB36 wheel motor builds on the success of its predecessor. Held to the highest standards, the transmission was subjected to extensive testing and quality confirmation. A full scale controlled durability and field test was conducted at Komatsu’s Proving Grounds during development to confirm design quality prior to production. By using planetary design, extensive machining is not required during a standard rebuild.
All Hydraulically Actuated Dry Disc Brakes

- Front 47.75 in (1213 mm) Diameter Wheel Speed Disc with a 3-Caliper Design on each Brake
- Rear Dual 25 in (635 mm) Diameter Disc with a single Caliper per disc
- Static Dry Disc Park Brakes
- Park Brake Protection Logic
- Park Brake will not apply at truck speeds above 8km/h or 5 mph
- If park brake is applied while the truck is in motion the system will reduce speed and apply service brakes until the machine is below .48 km/h or .3 mph.
- Rated to Hold Maximum GVW @15% Grade

System meets ISO 3450-2011
**EASY MAINTENANCE**

**Access, Service and Convenience**
Located on the front left bumper adjacent to the main entry to the machine, Komatsu installs many service and convenience items. This central location simplifies maintenance events, reducing the time the truck is out of service for routine upkeep.

1. Auto-lubrication tank and controls
2. Power, starter and drive system lockout (lock-out/tag-out capable switches)
3. Emergency engine shut-down
4. Fluid service center (coolant, engine oil, hydraulic oil, grease fill)
5. Hydraulic step up/down switch (Hydraulic stairs are optional)

**KOMTRAX Plus 2®**
As part of a complete service and support program, Komatsu equips every mining and quarry sized machine with KOMTRAX Plus 2®. By using a satellite-based communication system, KOMTRAX Plus 2® offers a new vision of monitoring your valuable assets. By providing insight to critical operating metrics the user can manage increased availability, lower owning and operating costs and maximize fuel efficiency.

The information available through KOMTRAX Plus 2® allows service personnel to review faults and trends, improve the quality of the troubleshooting process and reduce unscheduled machine downtime.

**Flange Type Tire Rims**
Komatsu Smart rim technology allows easy removal and installation of the tires to minimize the overall impact on downtime.
**Drive System (Invertex Ile)**
- Cooling Blower Inverters (CBI)
- True Quad Chopper Eliminates RP Contactors
- Only Single Stack IGBT’s
- From 24 to 12 Traction IGBT’s Reduces Weight & Size
- Meets IP54 for Dust & Moisture Control
- Increased Cabinet Rigidity
- Reduced Rigid Multi-axis Joints
- Fiber Optic Cards Integrated Into Backplane
- Front Placement of Indicator & Interface Panels
- Front Access for Maintenance
- All LED Lighting

**Improved Bus Bar**
- Close Molded Design- Eliminates Potting
- No Soldered Bushings
- Edge Protection
- FR4 & Abrasion Protection
- Simplified, More Robust Bus Bar Design
**DRIVE SYSTEM**

**Improved Truck Performance**
- Retains Wheel Slip/Slide control in all Modes of Operation
- Cruise Control (Both Motoring & Retarding)
- Fuel Saver 2 Built-in

**Technology Advancements**
- Supports Data Collection & Transmission for Remote Monitoring
- New Generation Technology for Faster Processing with Higher Capacity (90% Faster Data Transfer)
- Common CAN Network Consists of Engine, Truck & Drive System
- Supports CAN, Ethernet & USB

**VID Display**
- Replaces DID Panel
- In-cab Touch Screen Display for Setup, Maintenance & Troubleshooting
- Access, Download & Update System from the Operators Cab
- Entry to Control Cabinet no Longer Required for Basic Troubleshooting

**WebPTU**
- Replaces wPTU
- Primary Maintenance & Troubleshooting Tool for all Future Systems
- Browser Based Access & Visualization of Truck System Data
- Eliminates Dependency on Legacy PC’s & Operating Systems
- Accessible in Operators Cab via Ethernet
Environmentally Friendly

Less Fluids than Mechanical Drives
Komatsu electric drive trucks contain 57% less hydraulic fluid compared to similar class mechanical drive trucks, creating a lower environmental impact and makes fluid replacement simpler, quicker and more economical.

U.S. EPA Compliant
The Komatsu SDA16V160 engine is compliant with the U.S. EPA Tier 4 emissions regulations.

Reduced Fuel Consumption
The engine and drive system are specifically tuned together, providing efficient power usage and minimizing fuel consumption.

Komatsu Loading Policy for Mining Trucks

In normal loading operations, variations in payloads occur. The loading policy identifies the guidelines and limitations for the loading of those Komatsu Mining Truck models specified.

Definitions:

• Rated GVW (Gross Vehicle Weight) includes the chassis, body, tires, accessories (including local options), lube, fuel, operator, payload and any excess material build-up.

• Rated Payload is the resultant difference of Rated GVW minus EVW.

• Overload refers to any payload amount in excess of the Rated Payload.

• Never to exceed GVW is the maximum allowable GVW under the guidelines of this Policy.

Actual payloads greater than the Rated Payload are allowable, but shall not result in a GVW that is greater than the Never to Exceed GVW.

No single payload that results in a GVW in excess of the Never to Exceed GVW is allowed under any circumstances.

The mean of all payloads for a rolling 30-day period shall not exceed the Rated Payload.

### COOLING SYSTEM

L&M radiator assembly, split-flow, with deaerator-type top tank.

Radiator frontal area | 6.24 m² 67.2 ft²
**HYDRAULIC SYSTEM**

Steering........ Accumulator assisted with twin double acting cylinders provide constant rate steering.

Secondary steering automatically supplied by accumulator.

Turning circle diameter (SAE)........................................... 29.3 m 96'

Reservoir ...................................................................947 L 250 U.S. gal

Filtration......................................................................In-line replaceable elements

Suction .................................................................Single, full-flow, 100 mesh

Hoist and steering...............................................Dual, in-line, high pressure

Brake component cabinet.................................Above deck, easily accessible with diagnostic test connections

Hoist ...........Two 3-stage dual acting outboard cylinders, internal cushion valve, over-center dampening

Hoist times

Power-up loaded ..................................................23 sec

Power-down ..........................................................16 sec

Float-down empty .................................................17 sec

Pumps...................................................................Two pumps, single package, in-line

Hoist and brake cooling.............................................Tandem gear pump with output of 931 lpm 246 gpm at 1900 rpm and 18960 kPa 2,750 psi

Steering and brake ........Pressure-compensating piston pump with output of 246 lpm 65 gpm at 1900 rpm

System relief pressures

Hoist ..............................17237 kPa 2,500 psi

Steering and brake ..........................20685 kPa 3,000 psi

Ports available for powering disabled truck and for system diagnostics

---

**ELECTRICAL SYSTEM**

4 x 8D 1400 CCA, 12 volt, in series/parallel, 275 ampere-hour, bumper-mounted with disconnect switch & lock-out.

Alternator ..........................................................24 volt, 275 amp

Lighting .................................................................24 volt

Cranking motors .............................................Two 24 volt

Nominal payload is defined by Komatsu America Corp’s payload policy documentation. In general, the nominal payload must be adjusted for the specific vehicle configuration and site application. The figures above are provided for the basic product description purposes. Please contact your Komatsu distributor for specific application requirements.

*Includes options allowance
STANDARD EQUIPMENT

- Air cleaners, Donaldson® SSG w/ auto evacuators
- Alternator (Charging 24 volt/250A)
- Automatic lubrication system w/ground level fill, level indicator & dynamic timing
- Back-up alarm
- Batteries—4 x 8D (1450 CCA’s)
- Battery charging/jump start connector
- Body over-center device
- Body-up sling (w/KAC supplied body)
- Cruise control
- Electric start
- Eliminator®, Cense®
- Fast-fill fuel system (in tank and left side remote)
- Filters, high pressure hydraulic
- Ground level radiator fill
- Hydraulically actuated dry disc brakes
- Mirrors, heated, multi-cambered convex LH & RH
- Mud flaps
- Muffled exhaust-deck-mounted
- Power supply, 24 volt to 12 volt DC
- Quick disconnects (steering, hoist and diagnostics)
- Radiator sight gauge
- Removable power module unit (radiator, engine, alternator)
- Reverse retarding
- Service center–LH
- Thermostatic fan clutch

OPERATOR ENVIRONMENT & CONTROL:

- All hydraulic service brakes with auto apply
- Battery disconnect switch
- Brake lock and drive system interlock
- Circuit breakers, 24 volt
- Diagonal staircase across grille
- Dynamic retarding with continuous rated element grids
- Engine shutdown at ground level
- Hoist propulsion interlock
- Horns (electric-front)
- Integral ROPS/FOPS Level 2
- Maintenance and power lockout
- Parking brakes with warning light & speed application protection
- Power steering w/auto secondary steering
- Protective deck handrails
- Pump driveline protector
- Radiator fan guard
- Seat belts
  - Operator 3-point 51 mm 2” retractable
  - Passenger lap 51 mm 2” retractable
- Slip-resistant walkways

STANDARD HIGH VISIBILITY DELUXE CAB:

- AC drive interface display
- Air conditioner HFC-134A
- AM/FM radio with CD, USB & MP3
- Dome light
- Electronic Dash & Status Panel
  - Body up
  - Engine oil temperature (high)
  - Parking brake
  - Propulsion system not ready
  - No DC link voltage
  - No prop
  - Service brake applied
  - Wheel brake lock applied
  - Maintenance monitor
- Engine hourmeter, oil pressure gauge, coolant temperature gauge, hydraulic oil temperature gauge
- Engine shutdown w/ “Smart Timer” delay
- Floor mat (double barrier)
- Fuel gauge in cab
- Fuel gauge in engine compartment
- Fuel gauge in hydraulic system
- Fuel gauge in coolant system
- Headlight switch
- Heated and defroster (heavy-duty)
- Headlight switch
- High beam selector and indicator
- Horn switch (center of steering wheel)
- Indicator lights (blue)
- Horns (electric-front)
- Integral ROPS/FOPS Cab Level 2
- Maintenance and power lockout
- Parking brakes with warning light & speed application protection
- Power steering w/auto secondary steering
- Protective deck handrails
- Pump driveline protector
- Radiator fan guard
- Seat belts
  - Operator 3-point 51 mm 2” retractable
  - Passenger lap 51 mm 2” retractable
- Slip-resistant walkways

OPTIONAL EQUIPMENT

Note: Optional equipment may change operating weight.

- Amber Beacon Light
- Application Specific Body Structure
- Body liners
- Body-up sling
- Bumper Mounted Headlights
- Double Wall Exhaust Tubes
- Engine Access Platform-LH
- Extended canopy
- Eyebrow
- Fire extinguisher 9 kg 20 lb
- Heated body
- Hot start engine oil (220V 2-500W)
- Hot start hydraulic oil
- Hot start engine coolant (220V 2-2500W)
- Hubodometer
- Komatsu Smart Rims
- Komtrax All-Around Monitoring System
- LED Headlights
- Lights (HID)
- Mufflers between frame rails
- PLM IV® scoreboards
- Premium Operator Seat
- Service center–RH
- Shutters (radiator)
- Spare Rim
- Smart Rim
- Suspensions (cold weather)
- Rock Ejectors

LIGHTING:

- Back-up lights–rear mount (2) halogen
- Back-up lights–R and L–deck mount (2) halogen
- Brake and retard lights on top of cab
- Clearance lights (LED)
- Dynamic retarding, rear (2) (LED)
- Engine compartment service lights
- Fog lights (2) halogen
- Headlights (8) halogen
- Manual back-up light, switch and indicator
