### KOMTRAX ELECTRIC DRIVE POWERTRAIN

With tens of millions of operating hours, the Komatsu powertrain has proven efficiency in every application. This system features:

- Top speed of 61 kph 38 mph
- Invertex II™ control system with double-stacked IGBT
- Fuel efficient Komatsu SSDA18V170 engine

---

**Productivity Features**

- High performance Komatsu SSDA18V170 engine Gross Horsepower 2610 kW **3,500 HP**
- GE dual IGBT AC electric drive system
- 4476 kW **6,000 HP** continuous retarding capability
- Traction (spin-slide) control
- Automatic retard speed control
- Komatsu designed application specific body
- Tight turning radius 15.9 m **52’ 2”**
- Payload Meter IV (PLM IV)

---

**Reliability Features**

- Frame design optimized for 363 metric ton **400 short ton** payload
- Simple and reliable hydraulic system
- Steering and brake accumulators
- Hydraulically actuated multiple-disc wet brakes (All four wheels)

---

**Environmentally Friendly**

- Komatsu SSDA18V170 engine is compliant with current U.S. EPA emissions regulations
- Fuel efficient engine
- Less fluids compared to mechanical drive trucks

---

**Operator Environment**

- Ergonomically designed spacious cab with excellent visibility
- Fully adjustable driving position settings
- Four post ROPS/FOPS Level 2 cab
- User friendly display with payload information
- Komatsu Hydraid® II suspensions designed for optimum ride comfort
- AM/FM/CD/MP3/USB/weather band radio
- Optional KomVision™ All Around Monitoring System

---

**Easy Maintenance**

- KOMTRAX Plus® allows immediate diagnostics of key engine, chassis, and drive system components
- Oil-cooled wet disc braking system reduces wear and extends component replacement intervals
- Automatic lubrication system
- Eliminator® oil filtration system
- Flange mounted rims with optional Komatsu Smart, speed type rims
- In-tank fast fuel system

---

KOMTRAX Plus equipped machines can send SMR and trend information to a secure website utilizing wireless technology. Machines also relay error codes, cautions, maintenance items, fuel burn, and much more.
Komatsu High Horsepower Engine
The 2610 kW 3,500 HP Komatsu SSDA18V170 engine will operate in most of today’s mining applications without experiencing power derate. Fuel efficiency is maximized due to optimized air handling with two-stage turbocharging. Standard features include:
- A standard pre-lube system designed to reduce start-up wear and increase overhaul life.
- CENSE® on board monitoring of engine performance for each cylinder.
- ELIMINATOR® filtration system reduces oil and filter changes by one-third.

Dual IGBT AC Electric Drive System
The GTA39 traction alternator coupled with GDY108C wheelmotors and Invertex II® AC control system provides reliable performance and easy maintenance. Invertex II® offers independent control of the rear wheelmotors, which in turn provides outstanding traction-ability during wet and slippery conditions, thus improving tire wear and operator confidence.

The air cooled Insulated Gate Bipolar Transistor (IGBT) inverter system technology provides the highest available reliability. The IGBT inverter is more compact and much simpler than the design of its predecessor, the Gate Turn Off (GTO) inverter, which improves serviceability and routine maintenance.

Electric Dynamic Retarder
The 4476 kW 6,000 HP retarding system provides state of the art braking capacity for navigating today’s mining applications which contain steep continuous descents and sharp switchbacks. Continuous retarding capacity enhances the productivity of the vehicle operator, while eliminating the need for excessive mechanical braking effort.
Traction (Spin-Slide) Control
During slippery conditions, the 980E-4 wheel traction control technology detects and corrects wheel spin or slide events. Traction control operates automatically and independently of the service brakes. During propulsion, “wheel slip control” reduces non-productive wheel spin in low traction conditions. During retarding, “wheel slide control” prevents wheel lockup and subsequent sliding.

Automatic Retard Speed Control
While in continuous descent, the operator has the capability to select a comfortable downhill travel speed. Automatic Retard Speed Control simultaneously manages the speed of each wheel independently to allow for any immediate adjustments needed during slippery underfoot conditions.

Komatsu Designed Application Specific Body
Utilizing the required Body Worksheet (BW) process, Komatsu ensures that each body is designed to meet the requirements for each specific application while carrying its rated payload. Komatsu works with each customer to understand the material properties at a mine site and to identify the appropriate liner package.

Komatsu offers a standard all-welded steel, flat floor body with a full canopy and horizontal bolsters. This body includes a driver side eyebrow, body up sling, and rubber mounts on the frame.
- Standard Body SAE Heaped 2:1: 250 m³ 327 yd³
- Standard Komatsu Body Weight: 41731 kg 92,000 lbs
**Productivity Features**

**Tight Turning Radius**

By using double acting hydraulic steering cylinders with a six-point articulation linkage, the 980E-4 power steering system provides positive steering control with minimal operator effort. The turning radius of the 980E-4 is 15.9 m (52'2")**, which provides excellent maneuverability for tight loading and dumping conditions. The steering accumulators comply with ISO-5010 standards.

---

**Payload Meter IV (PLM IV)**

PLM IV is an electronic system that monitors and records payload information for Komatsu’s off-highway mining trucks. The accurate and reliable payload measurement system is designed to help optimize payload, maximize productivity and reduce the life cycle cost of the machine. PLM IV tracks and records the following key production parameters:

- Payload
- Empty Carry-Back
- Operator Identification
- Haul Cycle, Loading, Dumping Time and Date
- Distance Traveled (Loaded and Empty)
- Cycle Time Information
- Maximum Speeds (Loaded and Empty)
- TMPH Estimate for Front and Rear Tires
- Average Speed (Loaded and Empty)

---

**Hydrair® II Hydropneumatic Suspension**

Hydrair® II is a suspension system that utilizes four nitrogen-over-oil cylinders. This suspension system is designed to maximize machine productivity by providing the operator with a smooth and comfortable ride. By absorbing shocks to the chassis during operation, Hydrair® II contributes to the durability of the machine’s frame and components.
Ergonomically Designed Cab
The Komatsu 980E-4 cab design provides a comfortable and productive environment to meet today’s mining demands. The cab includes tinted safety glass windows, heating and air conditioning, acoustical insulation, double sealed doors, and filtered and pressurized air to reduce dust.

User Friendly Display
The 980E-4 comes with a new operator friendly dash configuration which includes lighted gauges, switches and information panel. This allows the operator to see the status of the machine during operation and identifies any faults. An instructive message will appear after any fault is detected on the machine.

Built-in ROPS and FOPS Structure
These structures conform to ISO standards 3471 and 3449.

Operator Seat
Komatsu recognizes that operator comfort is a key to productivity in today’s mining environment. The five-way adjustable operator seat and the tilt-telescopic steering column provide an optimum driving posture for increased operator comfort and control over the machine. The air suspension seat absorbs vibrations transmitted from the machine, reducing operator fatigue. A 51 mm 2 in wide, blaze orange, three-point seat belt is provided as standard equipment.
Structurally Enhanced Frame Design
By using advanced computer-aided design, finite element analysis, and full-scale static and dynamic testing, the frame has been designed to carry 363 metric tons 400 short tons and provides the high structural reliability Komatsu is known for.

Castings Used in High Stress Areas
To increase frame reliability, steel castings have been incorporated at key frame pivot points and key load bearing critical portions of the frame. This includes the rear body pivot and horsecollar sections.

Simple and Reliable Hydraulic System
The hydraulic system is a proven and reliable design with fewer parts than other OEMs. The system utilizes a single tank, providing one common source of fluid for steering, braking, and hoisting. In-line, replaceable filtration elements provide protection from hydraulic system contamination, making the system easier to service.

To keep downtime to a minimum, Komatsu developed a sub-frame pump module that can be removed and replaced as a single unit. This reduces change-out time and allows easy access to the hydraulic pump module.

Proven Wheelmotor Design
The GDY108C wheelmotor builds on the success of its predecessor. Held to the highest standards, the transmission was subjected to extensive testing and quality confirmation, both on the bench and in the field. A full scale bench durability test was conducted during development to evaluate design quality prior to production. By using planetary design, extensive machining is not required during a standard rebuild.
Fully Hydraulic Controlled Multiple-Disc Wet Brakes

Although the dynamic retarding system is the primary braking force, the 980E-4 comes standard with four-wheel, hydraulically actuated, oil cooled service brakes. In the event that the truck’s hydraulic system pressure drops below an acceptable level, accumulator tanks will automatically apply all wheel brakes to bring the truck to a complete stop.

- Max. service apply pressure: 18960 kPa \(2,750\) psi
- Total friction area per brake: \(103729\) cm\(^2\) \(16,078\) in\(^2\)

The oil cooled brake system provides lower maintenance costs and higher reliability versus dry disc brakes. This system is fully sealed to help keep contaminants out and reduce brake wear and maintenance. The brakes are hydraulically actuated, no pneumatic system is used. There are three independent hydraulic circuits that provide hydraulic back-up.

The 980E-4 stops in 57% of the required distance as stipulated by ISO 3450.
Extended Engine Oil Change
CENTINEL® is a continuous oil management system that extends oil change intervals for up to 4,000 hours. Engine oil is injected into the fuel system for consumption at a rate proportional to fuel burn. ELIMINATOR® is a self-cleaning filtration system that offers extended filter change intervals and superior serviceability.

Access, Service and Convenience
Located on the front left bumper adjacent to the main entry to the machine, Komatsu installs many service and convenience items. This central location simplifies maintenance events, reducing the time the truck is out of service for routine upkeep.

1. Auto-lubrication tank and controls
2. Power, starter and drive system lockout (lock-out/tag-out capable switches)
3. Ground level engine shut-down
4. Fluid service center (coolant, engine oil, hydraulic oil, grease fill)
5. Switch for access lights

KOMTRAX Plus®
As part of a complete service and support program, Komatsu equips every mining and quarry sized machine with Komtrax Plus®. By using a satellite-based communication system, Komtrax Plus® offers a new vision of monitoring your valuable assets. By providing insight to critical operating metrics the user can manage increased availability, lower ownership and operating costs and maximize fuel efficiency.

The information available through Komtrax Plus® allows service personnel to review faults and trends, improve the quality of the troubleshooting process and reduce unscheduled machine downtime.

(Optional) Komatsu Smart Rims
Komatsu Smart Rim technology allows easy removal and installation of the tires to minimize the overall impact on downtime.
Environmentally Friendly

Less Fluids Than Mechanical Drives
Komatsu’s 980E-4 contains 63% less hydraulic fluid compared to similar class mechanical drive trucks, creating a lower environmental impact and making fluid replacement simpler, quicker and more economical.

U.S. EPA Compliant
The Komatsu SSDA18V170 engine is compliant with the U.S. EPA emissions regulations.

Reduced Fuel Consumption
The engine and drive system are specifically tuned together, providing efficient power usage and minimizing fuel consumption.

Payload Policy

10-10-20 Load Policy Criteria
Recognizing that variation occurs naturally in material density, fill factors, and loading equipment, Komatsu America Corp. utilizes a defined payload policy. This payload policy is intended to identify the guidelines and limitations for the loading of Komatsu mining trucks, and is valid for approved applications and haul profiles only.

1) The average monthly payload must not exceed the rated payload of the truck.
2) 90% of all loads must be below 110% of the rated payload of the truck.
3) 10% of all loads may be between 110% and 120% of the rated payload of the truck.
4) No single payload may exceed 120% of the rated payload of the truck.
ENGINE

Make and model ................................................. Komatsu SSDA18V170
Fuel ................................................................. Diesel
Number of cylinders ......................................... 12
Operating cycle .................................................. 4 cycle
Gross horsepower* ............................................. 2610 kW 3,500 HP @ 1900 rpm
Net flywheel power* ........................................... 2495 kW 3,346 HP @ 1900 rpm
Weight (wet) ..................................................... 11750 kg 25,897 lbs
Weight (dry) ....................................................... 11250 kg 24,795 lbs

Optional: Tier 4 (TPM) Engine
* Gross horsepower is the output of the engine as installed in this machine, at governed rpm and with engine manufacturer’s approved fuel setting. Accessory losses included are water pump, fuel pump and oil pump.
** Net flywheel power is the rated power at the engine flywheel minus the average accessory losses. Accessories include fan and charging alternator. Rating(s) represent net engine performance in accordance with SAE J1549 conditions.

ELECTRIC DRIVE

AC/DC CURRENT
Alternator ............................................................. GTA-39
Dual Fan Main Blower ............................................. 340 m³/min 12,000 cfm
Control .............................................................. AC Torque Control System
Motorized wheels* .............................................. GDX108-C Induction Traction Motors
Speed (maximum) ............................................... 61 km/h 38 mph

* Drive system performance depends upon gross vehicle weight, haul road grade, haul road length, rolling resistance and other parameters. Komatsu must analyze each job condition to assure proper application.

TIRES AND RIMS

Rock service, tubeless, radial tires
Standard tire* .................................................... 59/80 R63
Flange mount, five piece rim .... 1118 mm x 1600 mm x 140 mm
44° x 63° x 5° rim assembly.
Rims rated at 758 kPa 110 psi cold inflation pressure.
Typical total tire weight .................. 32585 kg 71,838 lbs

* Tires should meet application requirements for kph/MPH, tread, compound, inflation pressure, ply rating or equivalent, etc.

CAB

Advanced Operator Environment with integral 4-post ROPS/ FOPS Level 2 structure (ISO 3449), adjustable air suspension seat w/lumbar support and arm rests, full-size passenger seat, maximum R-value insulation, tilt and telescoping steering column, electric windshield wipers w/washer, tinted safety glass, power windows, Payload Meter N, 55,000 Btu/hr heater and defroster, 21,000 Btu/hr air conditioning (HFC – 134A refrigerant)

SUSPENSION

Variable rate hydro-pneumatic with integral rebound control
Max. front stroke ........................................... 303 mm 11.92”
Max. rear stroke ............................................. 239 mm 9.40”
Max. rear axle oscillation .................................. ±6.5°

FRAME

Advanced technology, full butt-welded box sectional ladder-type frame with integral ROPS supports, integral front bumper, rear tubular cross members, steel castings at all critical stress transition zones, rugged continuous horsec Defender, 21,600 Btu/hr air conditioning (HFC - 134A refrigerant)

E J1349 conditions.

BODY

All-welded steel flat floor body with horizontal bolsters and full canopy. Rubber mounts on frame, eyebrow and body up sling are standard. Extended canopy and pivot exhaust heating are optional.

Floor sheet ....................................................... 16 mm 0.63” Outer
Front sheet ....................................................... 10 mm 0.39” Center
Side sheet ....................................................... 10 mm 0.39” Center

Canopy sheet .................................................... 6 mm 0.24”

SAE heaped 2:1 ............................................. 250 m³ 327 yd³

Standard Komatsu body weight ........... 41731 kg 92,000 lb

COOLING SYSTEM

Replaceable core radiator assembly, split-flow, with deaerator-type top tank.

Radiator frontal area ................................. 7.02 m² 75.5 ft²
**HYDRAULIC SYSTEM**

Steering .................. Accumulator assisted with twin double acting cylinders provide constant rate steering. Secondary steering automatically supplied by accumulator.

Turning circle diameter (SAE) .................................. 32 m 105'

Reservoir .................................................. 947 L 250 U.S. gal

Filtration .................................................. In-line replaceable elements

Suction .................................................. Single, full flow, 100 mesh

Hoist and steering ...................... Dual, in-line, high pressure

Brake component cabinet ............. Above deck, easily accessible with diagnostic test connections

Hoist ........................... Two 3-stage dual-acting outboard cylinders, internal cushion valve, over-center dampening

Hoist times

- Power-up loaded ........................................... 21 sec
- Power-down (high idle) ............................... 16 sec
- Float-down empty (low idle) ....................... 17 sec

Pumps ........................................ Two pumps, single package, in-line

Hoist and brake cooling .................. Tandem gear pump with output of 931 lpm 246 gpm at 1900 rpm and 18960 kPa 2,750 psi

Steering and brake .......... Pressure-compensating piston pump with output of 246 lpm 65 gpm at 1900 rpm and 20685 kPa 3,000 psi

System relief pressures

- Hoist and brake cooling .................. 17237 kPa 2,500 psi
- Steering and brake ...................... 20685 kPa 3,000 psi

Ports available for powering disabled truck and for system diagnostics.

**ELECTRICAL SYSTEM**

4 x 8D 1400 CCA, 12 volt, in series/parallel, 220 ampere-hour, bumper-mounted with disconnect switch & lock-out.

Alternator ................................. 24 volt, 250 amp

Lighting .................................................. 24 volt

Cranking motors ................................. Two/24 volt

Nominal payload is defined by Komatsu America Corp’s payload policy documentation. In general, the nominal payload must be adjusted for the specific vehicle configuration and site application. The figures above are provided for the basic product description purposes. Please contact your Komatsu distributor for specific application requirements.
STANDARD EQUIPMENT

- Air cleaners w/ auto evacuators
- Automatic lubrication system w/ ground level fill, level indicator & dynamic timing
- Back-up alarm
- Batteries–4 x 8D (1400 CCA)
- Battery charging/jump start connector
- Body over-center device
- Body-up sling (w/KAC supplied body)
- Brakes: oil-cooled, multiple disc front & rear
- Control cabinet
- Electric start
- Eliminator®, Centinel®, Cense®
- Fast-fill fuel system (in tank and left side remote)
- Filters, high pressure hydraulic
- Ground level radiator fill
- Mirrors, heated, multi-cambered convex LH & RH
- Mud flaps
- Muffled exhaust–deck-mounted
- Power supply, 24 volt and 12 volt DC
- Quick disconnects (steering, hoist and diagnostics)
- Retard speed control w/set indicator
- Radiator sight gauge
- Removable power module unit (radiator, engine, alternator, blower)
- Reverse retarding
- Service center–LH
- Thermostatic fan clutch

OPERATOR ENVIRONMENT & CONTROL

- All hydraulic service brakes with auto apply
- Back up alarm
- Battery disconnect switch
- Brake lock and drive system interlock
- Circuit breakers, 24 volt
- Diagonal staircase across grille
- Dynamic retarding with continuous rated element grids
- Engine shutdown at ground level
- Hoist propulsion interlock
- Horns (electric–front)
- Integral ROPS/FOPS Cab Level 2

- Maintenance and power lockout
- Parking brakes with warning light & speed application protection
- Power steering w/auto secondary steering
- Protective deck handrails
- Pump drive line protector
- Radiator fan guard
- Seat belts
  - Operator 3-point 51 mm 2" retractable
  - Passenger lap 51 mm 2" retractable
- Slip-resistant walkways

STANDARD HIGH VISIBILITY DELUXE CAB

- AC drive interface display
- Air cleaner vacuum gauges
- Air conditioner HFC-134A
- AM/FM radio with CD, USB & MP3
- Dome light
- Electronic Dash & Status Panel
  - Body up
  - Engine oil temperature (high)
  - Parking brake
  - Propulsion system not ready
  - No DC link voltage
  - No propel
  - Service brake applied
  - Wheel brake lock applied
  - Maintenance monitor
- Engine hour meter, oil pressure gauge, coolant temperature gauge, hydraulic oil temperature
- Engine shutdown w/ "Smart Timer" delay
- Floor mat (double barrier)
- Fuel gauge in cab
- Fuel low level light and buzzer
- Gauges (w/backlight)
- Headlight switch
- Heater and defroster (heavy-duty)
- Heater switch
- High beam selector and indicator
- Horn (center of steering wheel)
- Indicator lights (blue)
- Engine service
  - KOMTRAX Plus® snapshot (IM)
  - Komatsu Payload Meter IV (PLM IV)

- LED headlights
- Turn signals (LED)
- Back-up lights–rear mount (2) LED
- Brake and retard lights on top of cab (LED)
- Clearance lights (LED)
- Control cabinet service light (LED)
- Dynamic retarding, rear (2) LED
- Engine compartment service lights (LED)
- Fog lights (2) halogen
- Headlights (8) halogen
- Manual back-up light, switch and indicator
- Payload lights R and L (LED)
- Stairway lights (LED)
- Step & tail lights (2) LED
- Turn signals (LED)

OPTIONAL EQUIPMENT

Note: Optional equipment may change operating weight.

- 300 gpm fast fuel: RH in-tank, LH remote
- Anti-freeze: below 40°F
- Body group, OEM ship loose*
- Bumper access - retractable steps
- Bumper mounted headlights
- Cold weather suspensions - front & rear
- Double wall exhaust
- Dump body - standard design
- Electric heater coolant
- Electric heater engine oil
- Electric heater hydraulic oil
- Engine access platforms
- Exhaust for heated body
- Fire extinguisher
- FLOC - LH service center
- Hydraulic tank - mud flaps only
- Hydraulic tank - ladder & mud flaps
- Komatsu Smart Rims
- Komatsu wireless bridge
- KomVizion™ All Around Monitoring System
- LED headlights
- PLM scoreboard displays: RH & LH
- Premium operator & passenger seats
- Radiator shutters
- RH diagonal boarding stairway (replacing LH)
- Service center–RH (replacing LH)
- Spare rim (1)
- Spare Komatsu Smart Rim (1)
- Suspension charging kit
- Tier 4 TPEM engine - Canada
- Tier 4 TPEM engine - United States
- Tool group

*Mandatory for Komatsu supplied body. Recommended for Komatsu designed, locally manufactured body. Not Applicable to third-party body.
