

TIP OF THE WEEK

MODEL: WA200-7, WA270-7 & WA320-7

FEATURE: MULTI-FUNCTION MONOLEVER

STD/OPT: STANDARD

SUGGESTED SETTING: NA

Blank (not used)

F-N-R

3rd Valve PCS

MAX Tractive Effort

The Multi-Function Monolever (MFML) is standard on the WA200-7, WA270-7, and WA320-7. With this control lever the operator is able to control the boom, bucket, 3rd valve function (if equipped), traction control level, and machine direction.

Remember that all MFML are equipped with the 3rd Valve Proportional Control Switch (PCS) switch regardless of the machine's configuration. The top blank is not used on the HST size loaders.

The MFML allows the operator to conveniently control all work equipment functions as well as machine direction with one hand.

The WA380-7, WA470-7 and WA500-7 can be equipped with a MFML as an option. On those models, the MAX traction switch becomes a kick-down switch and the blank button becomes a transmission gear hold switch.
