

TIP OF THE WEEK

MODEL **PC210LC-10 – PC800LC-8**
FEATURE **POWER MAX**
STD/OPT **STANDARD**
SUGGESTED SETTING **ACTIVATE AS REQUIRED**

The Power Max button located on top of the left joystick increases hydraulic relief pressure for up to 8.5 seconds for improved digging performance.

When activated, the Power Max button provides improved digging force when difficult digging conditions are present. The Power Max function is inactive when working in lift mode because relief pressure is already increased.

The Power Max button provides a temporary increase in digging forces for up to 8.5 seconds to help power through tough to dig materials.

For additional information, please consult the Product Bulletin, Operator's Manual or Shop Manual.
