

TIP OF THE WEEK

MODEL **HD465/605-8**
FEATURE **Engine Room Light**
STD / OPT **Standard**

HD465/605-8 machines come with a standard engine room light. The light is mounted in the engine access area on the front LH side of the machine. This light is convenient for checking the engine oil level and other daily checks.

Engine room light

The switch to turn the engine room light on and off is conveniently located adjacent to the machine access ladder on the front LH side of the machine. The switch is functional as long as the machine has battery power. Use of the engine room light switch does not require the ignition key switch to be turned on. Therefore, the light is especially helpful when performing daily checks during early morning or late night, when ambient lighting is not present.
