

TIP OF THE WEEK

MODEL	WA200, WA270, WA320
FEATURE	Multi-Function Monolever
STD / OPT	Standard
SUGGESTED SETTING	NA

The Multi-Function Monolever (MFML) is standard on the WA200-7, WA270-8 and WA320-8. With this control lever, the operator is able to control the boom, bucket and 3rd valve function (if equipped), traction control level and machine direction.

Remember that all MFML are equipped with the 3rd Valve Proportional Control Switch (PCS) regardless of the machine's configuration. The top blank is not used on the HST size loaders.

The MFML allows the operator to conveniently control all work and equipment functions as well as machine direction with one hand.

The WA380-8, WA470-8 and WA500-8 can be equipped with a MFML as an option. On those models, the MAX traction switch becomes a kick-down switch and the blank button becomes a transmission gear hold switch.

For additional information, please consult the Product Bulletin, Operator's Manual or Shop Manual. Photos may include optional equipment.
